

200	WITH MEANS RESPONSIVE TO MALFUNCTION	230	.Including electric circuit with switch operated by check
201	.Antijackpotting device	231	..Single switch
202	WITH ADDITIONAL, DISPARATE MEANS PREVENTING FRAUDULENT ACTUATION	232	.Including part locked by detent and released by check
203	.Means preventing use of tethered check	233	..Stationary detent
204	.Antijarring device	234	..And means to impart thrust to check to unlock part
205	CONTROL MECHANISM ACTUATED BY CHECK, OTHER THAN COIN (E.G., SLUG, TOKEN, CARD, ETC.), WHICH IS MUTILATED OR RETAINED	235	...Pivoted detent
206	.By pliant currency (e.g., dollar bill, etc.)	236	...And pivoted released part
207	..Including light sensitive testing device	237	.Check prevents locking of part by detent
208	.Having means to mutilate check	238	..Including reciprocating check mover
209	..And means to test physical characteristic of check	239	INCLUDING ELECTRIC CIRCUIT WITH SWITCH OPERATED BY CHECK
210	.Having means to read magnetically encoded check	240	.And holding circuit responsive to operation of switch
211	.Having electric circuit with switch operated by check	241	..Controlled by timer
212	.Having means to test physical characteristic of check	242	...Weight of check operates switch
213	..Test electrical or magnetic property	243	.And means to impart thrust to check to operate switch
215	INCLUDING VALUE ACCUMULATOR FOR PLURAL CHECKS	244	.Weight of check operates switch
216	.Having solid state circuitry	245	..And means holds switch in operative position
217	..Programmable	246	...Switch held by weight of check
218	..Including binary counter	247	INCLUDING PART LOCKED BY DETENT AND RELEASED BY CHECK
219	.And electric circuit with switch operated by check	248	.Stationary detent
220	..Accumulator includes electric circuit having stepper switch	249	.And means to impart thrust to check to unlock part
221	...Single check-operated switch	250	..Noncontacting, relatively movable parts connected by check
222	...Plural stepper switches	251	...Connected parts pivot
223	..Accumulator having ratchet wheel	252	...Connected parts reciprocate
224	.Having electric circuit completed by check itself	253	..Pivoted detent
225	.Mechanical accumulator	254	...And pivoted released part
226	..Having ratchet wheel	255Unidirectionally pivoted
227	...And indexing means differently responsive to various check values	256Spring biased
228	..And means to impart thrust to check to operate accumulator	257	...Released part biased by spring
229	CONTROL MECHANISM RESPONSIVE TO PLURALITY OF CHECKS	258	..Pivoted released part
		259	..Reciprocating released part
		260	.Weight of check unlocks part
		261	..Pivoted released part
		262	...Unidirectionally pivoted
		263Noncontacting, relatively movable parts connected by check
		264	...Having means to hold check in contact with detent
		265And ejector to remove check

266Check passageway has movable portion	303	.By testing material composition
267	...Having motor for driving released part	304	..Having electric circuit completed by check
268Spring motor	305	...Circuit includes thermocouple
269And regulating escapement mechanism	306	...Circuit includes three or more contacts
270And regulating ratchet mechanism	307	...Circuit includes movable contact
271Spring biased detent	308Pivotable
272And regulating ratchet mechanism	309Cam actuated
273Weight motor	310	..And means to impart thrust to check
274Having regulating escapement mechanism	311	...Unidirectionally pivoted
275Spring biased detent	312	..And means to stop check at contact
276	...Having regulating ratchet mechanism	313Pivotable
277	..Having means to hold check in contact with detent	314Solenoid actuated
278	..Having motor for driving released part	315	...Circuit includes spring contact
279	...Spring motor	316	...Circuit includes elongated contact (e.g., long slide, etc.)
280	...Weight motor	317	..Having electric circuit influenced by check
281Weight of check	318	...Passing between transmitting and receiving coils
282	..Having means to hold check in contact with detent	319	...Entering coil
283	..One piece detent	320	..Having magnetic field acting on check
284	...Biased by spring	321	..And scavenger mechanism
285	..Released part biased by spring	322Movable magnet
286	..To lock position	323Movable portion within check passageway
287	..Released part biased by weight	324	..And magnetically actuated deflector or stop
288	..Pivoted detent	325	...Speed or path of check altered
289	..Biased by spring	326	...After impact with rigid body (i.e., bounce test)
290	CHECK PREVENTS LOCKING OF PART BY DETENT	327	..Check impacts against rigid body (i.e., bounce test)
291	.Including check mover	328	..Having means to test surface configuration
292	..Pivoted	329	..Raised annular rim
293	INCLUDING NONCONTACTING, RELATIVELY MOVABLE PARTS CONNECTED BY CHECK	330	..Both faces of check
294	..And means to impart thrust to check to move part	331	..Serrated edge
295	..Having pivoted part	332	..Apertured check
296	...Coaxial pivoted parts	333	..And means to impart thrust to check
297Spring biased part	334	..Having means to test size
298	...And linearly reciprocating part	335	..Thickness
299Both parts spring biased	336	..By cradle sensor
300	..Parts spring biased	337	..By pivoted lever sensor
301	.Weight of check moves part	338	..By fixed gauge
302	INCLUDING MEANS TO TEST VALIDITY OF CHECK		

339 .Having means to test weight
340 ..By adjustable counterbalance
341 ..By spring counterbalance
342 **INCLUDING MEANS TO IMPART THRUST
TO CHECK**
343 .Introducing device
344 **INCLUDING SPECIFIC CHECK
PASSAGEWAY (E.G., CHUTE
DETAIL, ETC.)**
345 .And scavenger mechanism
346 .And movable check diverter
347 .Having means to divert spurious
matter
348 ..Liquid diverter
349 ..Wire or filament diverter
350 **WITH SPECIFIC CABINET STRUCTURE**
351 .Slot closure
352 .Check exhibitor
214 **CHECK, PER SE**
353 **MISCELLANEOUS**
